U.S. TO SEND 600 MARINES INTO MEXICO

Admiral Howard Ordered to Despatch Force to Protect American Colony.

WARSHIP NOW ON ITS WAY TO TOBARI BAY

Officials Realize Landing May Cause Grave Con-

sequences.

Washington, June 16 .- That the United States is determined henceforth to resort to firm measures to protect American life in Mexico is indicated in orders forwarded to Admiral Howard, in command of the Pacific fleet, to proceed to Tobari Bay, near Guaymas, on the west coast, with 300 marines and 300 Muejackets and to despatch this force twenty miles inland if necessary to protect an American colony that is menaced by the Yaqui Indians.

The American colonists, whom the Government is determined to protect, are said to be in great danger. Admiral Howard, who has started for Tobari Bay, is empowered to send the marines and bluejackets to the point of the trouble without further consultation with the Washington officials.

It is realized by officials that if this force lands on Mexican soil, as now seems certain, grave consequences may follow. The decision to rush a force to Tobari Bay was reached at conferences between State and Navy Department officials yesterday. Announcement of the decision was made to-day.

Advices from the west coast disclosed that the Indians are running amuck ties decided that failure on the Government to act promptly might result in a large loss of

les of food supplies out of Mexico. Information to the effect came from
Admiral Caperton, who is in command
in the east coast of Mexico.

He advised the Navy Department that
two large shipments of beans which
recently arrived at Vera Cruz had been
reshipped at once. It is assumed that
Carranza, who is said to be short of
money, is selling food abroad despite
the suffering among Mexicans.

Officials fear that the efforts of the
Red Cross to raise funds and supplies
in this country for the relief of Mexico
may be handicapped by the action of
Carranza in selling supplies for profit.

Carranza's action in shipping food
